

# Meetincs - Hunt

---

## Veni, vidi, vici, ...

MeeTincS also offers you the modern version of hunting: Geocoaching. The treasure hunt of the 21st Century (or a game according to the desired level!) involves finding cists (objects) by means of geopositioning via or satellite, in other words, with the help of a GPS that we provide you with.

You have to undergo different tests to pass the grade of Moldus, then Geomoldus in order to finally achieve recognition as a Geosearcher.

Geocoaching is for those who like maps, aerial photos, GPS, tracking, treasure hunts, hiking, walking, etc.
