

Meetings - Technical equipment

Hiring of conference equipment

The great advantage of MeeTincS is its complementarity. MeeTincS will put together teams of professional interpreters for you as well as provide for the hiring of simultaneous translation and audiovisual equipment in order to organise your meeting in the best possible manner. A one-stop shop that saves time and ensures optimum efficiency.

On account of its experience and its complete simultaneous translation equipment, MeeTincS had the privilege during the Luxembourg Presidency of the European Union in 1997 AND 2005 of supplying all the informal meetings of ministers, the two summits and the majority of the other peripheral meetings held in the Grand Duchy of Luxembourg, as well as the NATO ministerial meetings in May 1998 and the WEU in 1999. MeeTincS itself has 21 triple simultaneous translation booths – more than enough to cope with the biggest international meeting of the 2005 European Presidency with 21 languages represented.

MeeTincS constantly follows the state of the art of new technologies in order to ensure that you always receive the best possible quality of service. To do this, MeeTincS has technological equipment from DCN Bosch (Philips) and all its booths comply with the most stringent ISO standards, guaranteeing impeccable sound in the conference halls and simultaneous translation via ultra-efficient infrared equipment.

MeeTincS also stands for PA systems, projection, camera dome, company visitor systems, illuminating balloon, etc.
