

Meetincs - Audio

Public address

Comprehensive knowledge of the majority of conference halls in the greater region coupled with listening attentively to the needs of our customers enables us to provide you with the public address equipment best suited for your meetings.

In addition and in line with its aim of supplying you with the most efficient equipment possible, MeeTincS has just acquired wireless table microphones expressly designed for working lunches or dinners.

The main advantage of these wireless table microphones is that they do not clutter up your table unnecessarily and ensure flexibility of movement right up to the last second before your meeting starts.
